

Resubmitting RTPed Enrollment Applications

Informational Resource

WCMBP System Changes (**Effective 03/28/2021**)

PRIOR TO THE CHANGE

Previously, if an enrollment application was returned to Provider (RTP) from the WCMBP System for any reasons, such as incomplete or missing information, the system did not allow providers to resubmit the returned application. Providers were forced to initiate a new enrollment and re-enter all the required information which proved to be a time-consuming process.

AFTER THE CHANGE

The WCMBP system has been enhanced to allow Providers the ability to modify and resubmit initially returned (RTP) enrollment applications.
