

# Telehealth Bills and Authorizations

## Informational Resource

### WCMBP System Changes (Effective March 29<sup>th</sup>, 2021)

#### PRIOR TO THE CHANGE

Prior to the implementation of this change for telehealth bills, the WCMBP system required authorizations for DFEC telehealth bills, including those with Level 1 procedure codes.

Additionally, the system would override authorization level to level 3 when the authorization was submitted with modifier 95 or GQ and with CMS approved telehealth procedure codes.

#### AFTER THE CHANGE

As part of the change to the WCBMP System, the DFEC program has identified certain provider types (listed on second page of this document) who will no longer require authorizations for telehealth bills for specific procedure codes (also listed on second page of this document).

Additionally, a telehealth authorization will continue to be required with the modifier 95 or GQ if being submitted with provider type and/or procedure code NOT on the DFEC provided list. These authorizations will be updated to level 3 to allow Claims Examiner (CE) to review and determine the status.
